

This is a sample document for vocabulary analysis.
The implementation of this project utilizes complex algorithms to identify distinct words based on their CEFR levels.

We use Python as our programming paradigm.
The esoteric nature of some words might trigger the higher level classification.

Glossary

algorithm (*VERB*, B1): A collection of ordered steps that solve a mathematical problem. A precise step-by-step plan for a computational procedure that possibly begins with an input value and yields an output value in a finite number of steps.

analysis (*NOUN*, B1): Decomposition into components in order to study (a complex thing, concept, theory etc.).

classification (*NOUN*, B2): The act of forming into a class or classes; a distribution into groups, as classes, orders, families, etc., according to some common relations or attributes.

complex (*NOUN*, B1): A network of interconnected systems.

distinct (*VERB*, B1): Capable of being perceived very clearly.

document (*NOUN*, B1): An original or official paper used as the basis, proof, or support of anything else, including any writing, book, or other instrument conveying information pertinent to such proof or support.

identify (*VERB*, B2): To establish the identity of someone or something.

implementation (*NOUN*, B1): The process of moving an idea from concept to reality. In business, engineering and other fields, implementation refers to the building process rather than the design process.

level (*NOUN*, B1): A tool for finding whether a surface is level, or for creating a horizontal or vertical line of reference.

paradigm (*NOUN*, B2): A pattern, a way of doing something, especially a pattern of thought, a system of beliefs, a conceptual framework.

programming (*NOUN*, B2): To enter a program or other instructions into (a computer or other electronic device) to instruct it to do a particular task.

project (*NOUN*, B2): A planned endeavor, usually with a specific goal and accomplished in several steps or stages.

python (*NOUN*, B2): A type of large constricting snake.

trigger (*NOUN*, B1): A finger-operated lever used to fire a gun.

utilize (*VERB*, B2): To make use of; to use.

Vocabulary Statistics

Level	Count	Color
B1	9	Light Yellow
B2	7	Orange
