

This is a sample document for vocabulary analysis.

The implementation of this project utilizes complex algorithms to identify distinct words based on their CEFR levels.

We use Python as our programming paradigm.

The esoteric nature of some words might trigger the higher level classification.

Glossary

a (*PRON*, A1): The name of the Latin script letter A/a.

algorithm (*VERB*, B1): A collection of ordered steps that solve a mathematical problem. A precise step-by-step plan for a computational procedure that possibly begins with an input value and yields an output value in a finite number of steps.

analysis (*NOUN*, B1): Decomposition into components in order to study (a complex thing, concept, theory etc.).

as (*ADP*, A2): Definition not found for as

base (*VERB*, A2): Something from which other things extend; a foundation.

be (*AUX*, A1): Definition not found for be

cefr (*NOUN*, C2): Definition not found for cefr

classification (*NOUN*, B2): Definition not found for classification

complex (*NOUN*, B1): A network of interconnected systems.

distinct (*VERB*, B1): Capable of being perceived very clearly.

document (*NOUN*, B1): An original or official paper used as the basis, proof, or support of anything else, including any writing, book, or other instrument conveying information pertinent to such proof or support.

esoteric (*ADJ*, C1): Definition not found for esoteric

for (*ADP*, A2): Definition not found for for

higher (*ADV*, A2): Definition not found for higher

identify (*VERB*, B2): To establish the identity of someone or something.

implementation (*NOUN*, B1): The process of moving an idea from concept to reality. In business, engineering and other fields, implementation refers to the building process rather than the design process.

level (*NOUN*, B1): A tool for finding whether a surface is level, or for creating a horizontal or vertical line of reference.

might (*AUX*, A2): Definition not found for might

nature (*NOUN*, A2): Definition not found for nature

of (*ADP*, A1): Expressing distance or motion.

on (*ADP*, A2): To switch on

our (*PRON*, A1): Definition not found for our

paradigm (*NOUN*, B2): Definition not found for paradigm

programming (*NOUN*, B2): Definition not found for programming

project (*NOUN*, B2): A planned endeavor, usually with a specific goal and accomplished in several steps or stages.

python (*NOUN*, B2): Definition not found for python

sample (*NOUN*, A2): A part or snippet of something taken or presented for inspection, or shown as evidence of the quality of the whole; a specimen.

some (*PRON*, A1): Definition not found for some

the (*PRON*, A1): With a comparative or with more and a verb phrase, establishes a correlation with one or more other such comparatives.

their (*PRON*, A1): Definition not found for their

this (*PRON*, A1): Something being indicated that is here; one of these.

to (*PART*, A1): Toward a closed, touching or engaging position.

trigger (*NOUN*, B1): Definition not found for trigger

use (*NOUN*, A2): Definition not found for use

utilize (*VERB*, B2): To make use of; to use.

vocabulary (*NOUN*, A2): A usually alphabetized and explained collection of words e.g. of a particular field, or prepared for a specific purpose, often for learning.

we (*PRON*, A1): (personal) The speakers/writers, or the speaker/writer and at least one other person (not the person being addressed). (This is the exclusive we.)

word (*NOUN*, A1): The smallest unit of language that has a particular meaning and can be expressed by itself; the smallest discrete, meaningful unit of language. (contrast morpheme.)

Vocabulary Statistics

Level	Count	Color
A1	16	Light Green
A2	10	Green
B1	9	Light Yellow
B2	7	Orange
C1	1	Light Red
C2	1	Red
